

## BASS BOAT SET-UP

With a low, sleek profile and lots of horsepower, bass boats are for the serious freshwater angler. Finding fish and structure is critical, and there's no better way to do that than with one or two HELIX or SOLIX Series models near the driver's console. These units can be networked, providing ample screen space to showcase a LakeMaster map, MEGA Imaging, CHIRP Digital Sonar or 360 Imaging. A Minn Kota trolling motor is mandatory equipment, along with a secondary Humminbird fish finder at the bow. Finally, on the stern you may opt for a Talon shallow water anchor which will quietly deploy to hold you in place once you find your spot.

### Recommended Humminbird Units:

**SOLIX** 15, 12, 10

**HELIX** 12, 10, 9, 7
