

JON BOAT / UTILITY BOAT SET-UP

Small, lightweight and durable, these boats can be easily transported in a truck bed to a nearby lake or pond. Utility boats are the ideal choice for anyone who wants an economical option to get on the water. Mostly smaller than 16', these boats feature bench seats and are usually controlled by a small outboard motor or a transom-mount Minn Kota trolling motor. A single HELIX Series or PiranhaMAX 4 Humminbird fish finder is the optimal choice and can be either portable, or mounted along the side or bench.

Recommended Humminbird Units:

HELIX 12, 10, 9, 7, 5

PiranhaMAX 4, 4DI
