

KAYAK SET-UP

With a kayak, anglers gain portable access to almost any body of water they want to fish - fresh or salt. Thanks to their improved stability and the relatively low cost of entry, kayak fishing continues to grow in popularity. Whether you want to use your kayak for trolling or for casting, opt to having one equipped with a Humminbird HELIX 7 or HELIX 5 GPS/sonar combo model ensures you will always know your depth and location. And with AutoChart Live included on all GPS-equipped models, you can create your own depth contour map of any body of water.

Recommended Humminbird Units:

HELIX 7, 5
